SANHA®

PRESS FITTINGS

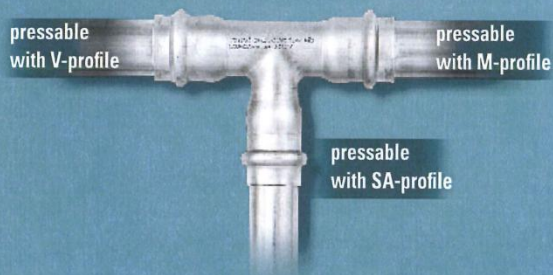

7 good reasons for SANHA

1 Broad product range

More than 8.000 pipes and fittings made of copper, stainless steel, carbon steel, bronze, brass and multilayer materials for pressing, soldering, welding, screwing and pushing in all standard dimensions from 6 mm to 259 mm from our four own production factories offer the optimal solution for all kinds of applications.

2 Extensive tool compatibility

With this unique pressing jaw and pressing machine compatibility SANHA reduces the investment costs for tools and the occurrence of defects on the construction site due to wrong tools.

3 Special hire rates for loan tools

If required, SANHA supports installers with special hire rates for loan tools. This helps, e.g., overcoming shortages in large projects as well as processing large dimensions, without the need for large investments in your own tools.

4 On-site training and consulting

The SANHA field service advises and supports in all questions and provides on-site assembly instructions for a safe, efficient use of the SANHA products.

5 Many certifications!

The SANHA system fittings are approved not only by WRAS, KIWA and DVGW, but also by many other important international certification bodies for all relevant applications.

6 Leak path feature!

The SANHA system fittings are designed in such a way that they visibly leak before they are crimped.

7 Full guaranty!

SANHA is fully responsible for the tightness of the connection!

ASGARD INDUSTRIAL SYSTEMS LTD.

PLASTIC

3fit®-Press – High flexibility

with maximum safety

- Wide product range from 14 to 63 mm
- Ideal for quick floor distribution
- May be installed even under close and difficult conditions
- Various pipe variants with insulation, protective pipe, etc.

3fit®-Push –

A first class

push system:

swift – simple – reliable

- Slim design with robust metal core
- Patented holding function without retaining claws providing lasting tightness
- Two O-rings for double safety
- Fast, reliable installation without bulky tools

CARBON STEEL

SANHA®-Therm –

Most extensive product range

- Ideal, e.g., for heating and sprinkler installations
- Relatively independent of raw material price speculation
- Can be combined perfectly with the broad malleable cast iron program

COPPER

SANHA®-Press – The all-rounder

- Extremely broad and deep product range from 12 to 108 mm
- Suitable for all copper pipes in compliance with DVGW
- Special product series for gas and solar applications

PURAPRESS –

The smart combination

- Fittings in high-quality copper alloy
- Three different stainless steel pipes can be used
- Extremely hygienic, durable and sustainable

STAINLESS STEEL

NiroSan® – Quality "Made in Germany"

- Complete product range from 15 to 108 mm
- Complete manufacturing in our own facilities in Germany
- No discharge of undesirable substances into drinking water
- Special series for gas, solar and industrial applications
- Also available in silicon-free version
- Four different types of stainless steel pipes for optimal solutions
