

ASGARD INDUSTRIAL SYSTEMS LTD.

VIR Valvoindustria Ing.

An international company leading in the production of valves suitable for all types of fluids. Today's production capacity exceeds 10 million pieces a year, most of which is exported world-wide.

VIR's principal activity is the production and distribution of ball valves, both manual and actuated, balancing valves, gate valves and butterfly valves in brass, bronze, polypropylene and cast-iron for the distribution of water and gas to be applied in plumbing, conditioning, industrial and irrigation installations.

The Company has a highly qualified team of technicians, dedicated to the development, research and study of new products; since 1992 VIR has held a quality system certification according to UNI EN ISO 9001:2008 standards, and innumerable international specific product certifications.

Today, VIR is a successful international company, thanks to its commitment to research and development. The quality of the products is attained by means of constant investment in innovation and the care given to the manufacturing from the very first productive stages. It is rare to find in the sector, but VIR has its own internal foundry, and itself provides the design and construction of the machines necessary for the assembly and packaging of the products, in order to guarantee a constant qualitative control.

Vir Product Range:

Static balancing valves

Dynamic balancing valves

Regulating ball valves

- Ball valves: Brass PN40
- Brass PN25
- Brass, DZR, Bronze and Cast Iron
- Crimp / Press
- Mini, 3 Ways
- Polypropylene
- Ball Cock

Ball and Butterfly valves for gas

Stainless steel ball valves

Electric and pneumatic actuators

Ball valves' accessories and spare parts

- Butterfly valves: Water/grooved butterfly
- Lug butterfly
- Actuators & accessories

Flexible joints and air vents

- Check Valves: Wafer check valves
- Swing check valves
- Other check valves

Strainers

Gate valves and globe valves
